

Progress I have made during this past week:

This past week was a slow start, I downloaded my software and watched tutorials that I had watched before to get a refresher. I also made a simple band without watching any tutorials to see where my skill level is.

- Found a free downloadable version of the rhino software- 5 minutes
 - Downloaded the software -15 minutes
 - Watched tutorial video 7 minutes https://www.youtube.com/watch?v=DjI_Sn1usJF0
 - Watched tutorial video 18 minutes <https://www.youtube.com/watch?v=wdkVC4S5zII>
 - Watched tutorial video 9:08 minutes <https://www.youtube.com/watch?v=6hnBaaUiHkM>
 - Watched tutorial video 15 minutes <https://www.youtube.com/watch?v=hOyFO5pScoc>
 - Watched tutorial video 10 minutes <https://www.youtube.com/watch?v=JsXg10lhGm4>
 - Made a simple band on Rhino 3D with tutorial help 50 minutes
- Total: 2hr 9 minutes

•

What I need to move forward with my capstone:

- Make many more designs and try doing designs as shown on the tutorials

Obstacles I have encountered and how I have moved forward:

- It is really hard for me to use the software right now. I barely made a basic band, I hope to keep practicing to get better

The Skills I've used and what I've learned:

- I improved my listening skills because some of the tutorials were quite hard to understand
- I learned some basic 3D designing skills
- I used my researching skills to find a free version of the software

My goals and deadlines for the next week:

- Next week I want to start practicing the designs they use in the tutorial
- I want to learn how to use key board short cuts for the software
- I want to practice making a design everyday

My Evidence of progress:

- Links of the tutorials are at the top of the page
- Here is the screen shot of my basic band
